

Day 2

Brief -

Redesign screen for web & mobile of Fizday's Home Page with existing same content of Text, Login and Create Account Form Section in same page.

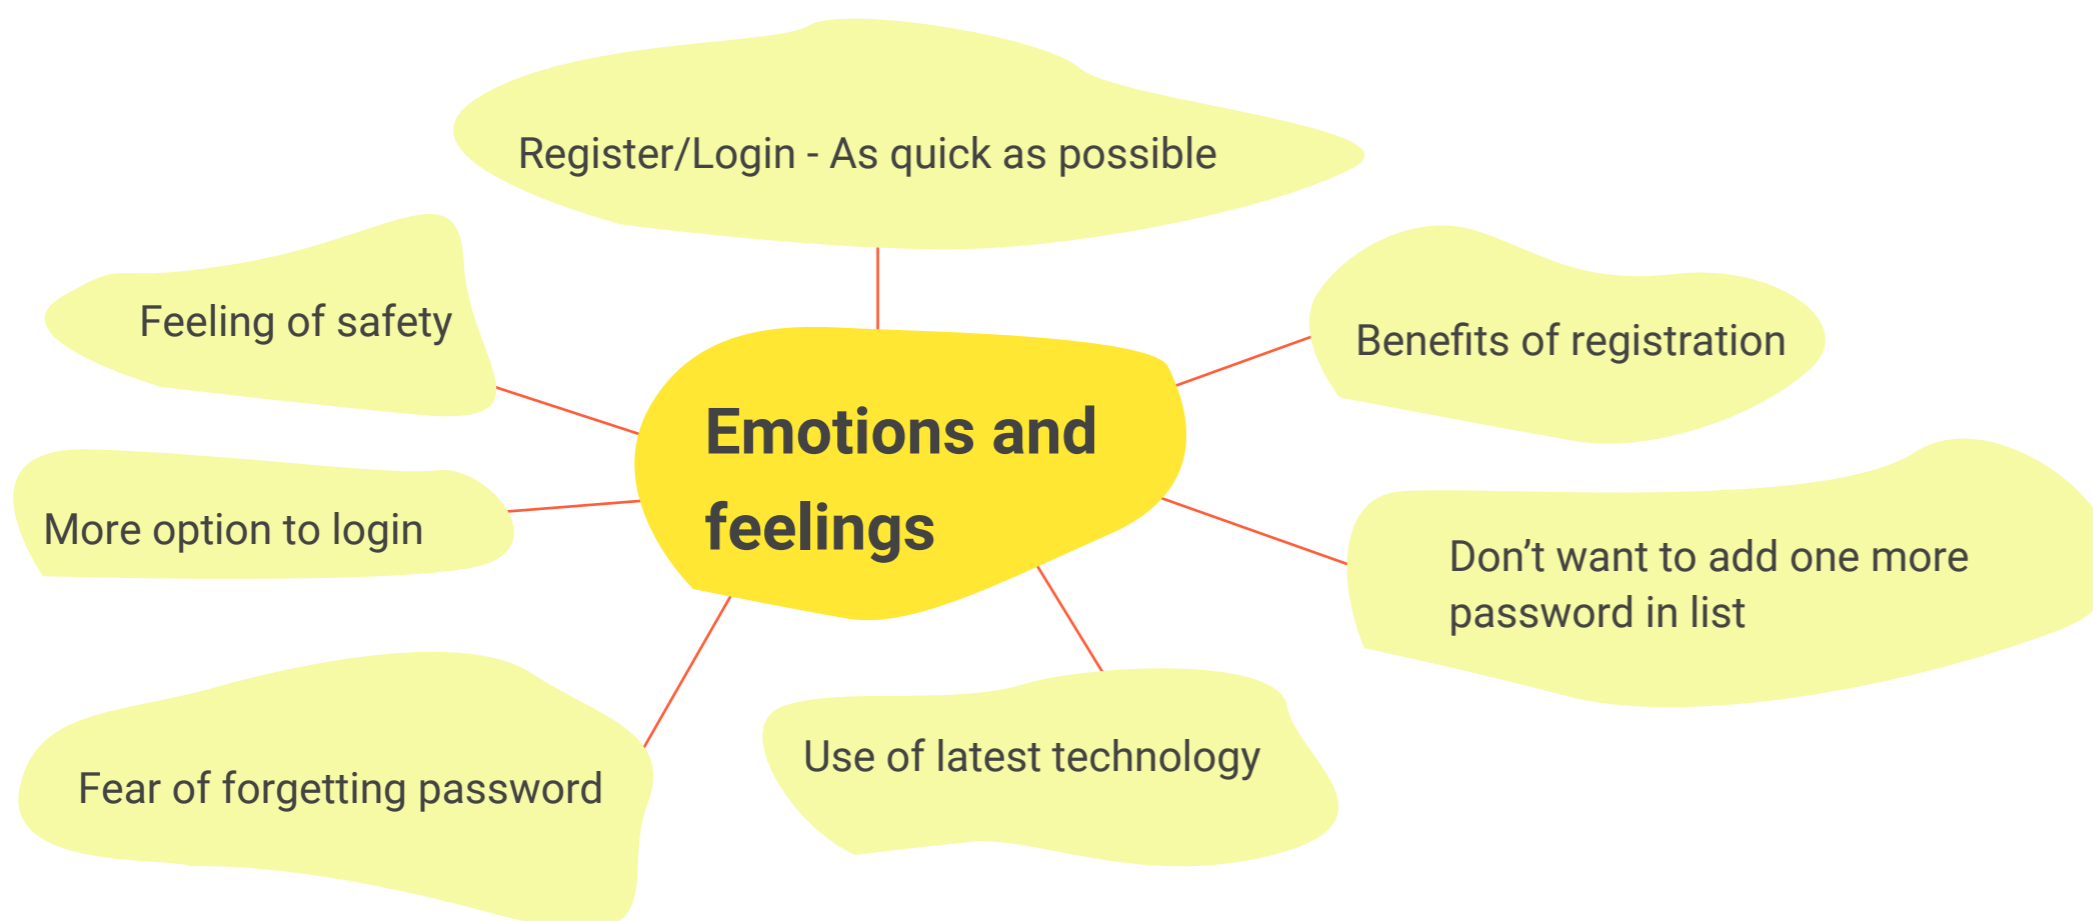

- Design should be focused on Emotions and Feelings of the designers.

Brainstorming -

- No one like to Register/Login on new site if his/her purpose is it just visit it on one time.
- **Typing passwords is more difficult on mobile** as it needs to switch keypads
- Entering a password character on mobile takes almost twice as much time than on the desktop
- study carried out at University
- **Trouble to remember passwords**

Instead of using Password, user can login using OTP sent to his number.
This eliminate the need of remembering passwords

Emotions and feelings while Login/Register

A community for anyone who designs. We help you get answers to your toughest design, share knowledge, get inspiration and get in touch with designers.
